QPS Advanced Backscatter Workshop

To coincide with Geohab 2016, but open to all, QPS will be hosting an Advanced Backscatter Workshop at their office in Banbury, UK on Friday 6th May 2016.

The workshop will cover the different types of backscatter, the sensors and formats we currently support and sensor specific information. As well as the new multi-spectral backscatter processing and tips and tricks on how to get the most out of FMGT.

The workshop will be a series of presentations and demonstrations, but attendees can also bring their own laptops and data. Fledermaus licences will be available for attendees on the day and evaluation copies to trial for the following month after the workshop.

The workshop will start at 0930 and finish around 1530 with a buffet lunch provided.

The cost per attendee is GBP 150.00

To confirm your place at our Advanced Backscatter Workshop please email: bmallace@qps.nl
